

## Aid to Busy Folks

The telephone aids the busy farmer to keep in touch with neighborhood affairs even during the rush season. He can call his neighbors in the evening and discuss the events of the day and arrange plans for community work after the crops are laid by.

Every farmer needs the help of the telephone. See the nearest Bell Manager or send a postal for our free booklet and see how small the cost is.

**DIVORCE YOURSELF**  
 From Dirt, Dust and Drudgery

by using a **Duntley**

**Combination Pneumatic Sweeper**

Release from broom drudgery—from the strain of moving and hitting furniture and from the dangerous scattering of dust and germs that are raised by the use of the broom and the old fashioned carpet sweeper, can be attained by the use of the Duntley Combination Pneumatic Sweeper, which, although easily operated by hand, creates powerful suction force which draws out all the dirt and dust found in your rugs and carpets and at the same time the revolving brush picks up all lint, pins, threads, ravelings, etc.

THE DUNTLEY SWEEPERS are made in three sizes and sold under a rigid guarantee for one year. You may try a Duntley in your own home for 10 days Free of Charge.

## ABDICATE AT CANAL

Captain Rodman to Command  
 Ships Crossing Isthmus.

Official Pilot Will Be His Deputy—  
 Engines of Steamship Will Be  
 Locked With Special Device  
 From Entrance to Exit.

New York.—That the Panama canal will not only be ready for commercial shipping in July, but so safe as to be "fool proof," from a sailor's point of view, is the assurance given at Colon by Capt. Hugh Rodman, U. S. N., who will have entire charge of all the details of putting shipping through.

According to Captain Rodman, the meteorological conditions are more favorable for shipping at the entrances of the Panama canal than at almost any other port in the world of anything like the importance of Colon and Balboa. At Colon the completion of one breakwater and the far advance of another give a still water entrance to the canal. The aids to navigation through Gatun lake have been made so clear that, as he believes, captains will find the passage through, day or night, as easy as a walk down Broadway, and the Culebra cut passage as easy as any large river.

All vessels entering the canal will have a canal pilot, who will take the ship to an anchorage, from which she may not move without permission of Captain Rodman or one of his port captains conveyed through the pilot.

All the officials who visit ships must report to Captain Rodman as head of the department of canal operation. As soon as the quarantine officer releases a ship each of the other canal officials will go on board.

As soon as a ship moves toward the canal its wireless and all signal arrangements will be under the immediate control of the canal authorities, represented by the canal pilot. In addition to the wireless and the international code signal systems each pilot will have with him certain "shape" signals. At three commanding points on the line canal signal stations have been provided, so that from one of them every ship will be practically in sight during its entire passage.

The engines of a ship will be turned over to the canal authorities the moment the vessel ties up to the approach wall of the canal locks. The engine will immediately be locked by the canal officials by means of a steel chain and a sealing device. This lock will be under the constant watch of a canal guard and an engineer of the ship until after leaving the locks, when its removal is ordered by the canal pilot on board.

The pilots have been selected by Captain Rodman and for three months he has been instructing and training them. Four of them are from the canals of the great lakes—men who have had experience taking the large ore ships through the Sault Ste. Marie canal. With these will be associated a number of picked men who are thoroughly familiar with local conditions.

At the Pacific entrance to the canal, Captain Rodman says, ships will find no tide interference whatever and an abundance of anchorage room.

When a vessel notifies the canal authorities in advance of its arrival as to what supplies are needed they will be put on board in the quickest possible time.

The law authorizing the furnishing of supplies to shipping at cost is interpreted to include the making of repairs at cost, and this will be done.

Captain Rodman graduated in 1880, and all except six years of his service since has been at sea. He has been around the world five times and has commanded ships in nearly every big port in the world. It was Rodman whom Admiral Dewey sent to demand the surrender of the Spanish batteries on Corregidor island, outside of Manila bay, and later those at Subig bay. When Admiral Osterhaus commanded the Atlantic fleet Rodman was the fleet captain. When the battleship fleet went to Europe last year Captain Rodman commanded the dreadnaught Delaware. From this he was sent to the isthmus at Colonel Goethals' request.

## KANSAS TO "BLEED" NO MORE

Business Men and Farmers to Carry  
 Truth About Sunflower State  
 to East.

Kansas City, Mo.—The state of Kansas will be called "bleeding Kansas" no more if plans completed here by R. R. Blittman, president of the Southeast Kansas Association of Commercial clubs, bear the fruit expected of them. Under the auspices of the association a special train of 11 cars will leave here to travel 3,500 miles through eastern states and spread "the truth about Kansas."

The train will carry exhibits of Kansas products and 230 farmers and business men, with columns of reliable information at their tongues' end. Commercial clubs of hundreds of cities, including New York, Boston, Philadelphia and Washington, have invited the Kansans to be their guests. President Wilson will receive them.

**Red Flannel Fat Reducer.**  
 Chicago.—Five yards of red flannel and two safety pins taken externally every day is the best prescription for flesh reducing, according to Policeman John Upton, who removed 22 pounds in 29 days to pass an examination.

## Forrest-Waterfield.

Sunday at the Maxwell House in Paris Miss Roxie Forrest and Mr. Bernie Waterfield, both, of Murray, Ky., were united in marriage, Esq. S. J. Cross saying the ceremony. (And, by the way, this was Esq. Cross's first appearance as a marrying squire but he performed the solemn rites like an old veteran of the Cross.)

Miss Forrest is the charming and handsome daughter of Mr. Alex Forrest a marble manufacturer of Calloway. She is a young woman of rare beauty and grace and Mr. Waterfield is to be congratulated upon winning her as a life companion.

Mr. Waterfield comes of a fine old family, many of whom reside in Henry county and in other parts of West Tennessee. The legion of friends of these splendid young folk wish for them all the good things obtainable in this earthly dwelling place and the Parisian heartily joins in their best wishes.

## Greatest Science.

"The greatest science men can study is the science of living with other men. There is no other thing that is so taxing, requires so much education, so much wisdom, so much practice as how to live together." We are studying how to control the forces of nature, but the forces of human nature are more difficult still. There is no art that is finer than the art of being at peace with our neighbors, national and individual.—Selected.

## Value of Generalship.

A friend whom you have been gaining during your whole life, you ought not to be displeased with in a moment. A stone is many years becoming a ruby; take care that you do not destroy it in an instant against another stone.—Saadi.
